**Subject:** Microsoft Settlement

The proposed settlement WAS NOT enough to punish the guilty party and restore competition in the industry. Besides by funding and operating biased organizations Microsoft is further using its financial power to benefit itself using predatory techniques. The lengthy lawsuit is directly caused by Microsoft's intentional delay to make a defacto victory over Netscape using its monopoly power. Now with XP it is moving further in a more aggressive and illegal direction. It will be most unfortunate for America if this settlement is passed in its current form.
